

H-Frame Kits

H-Frame Kits to support ducts, pipes and electrical containment

Application

The H-Frame kits are suitable for everyday installation of ductwork including associated attenuators. Small to medium sized flow and return pipework and electrical containment e.g. cable trays or cable ladders.

Advantages

Our H-Frame kits offer the installer full flexibility by providing a solution where they can supply their own strut to suit their installation requirements. The H-Frame kits are supplied with a pair of either 12.5" feet, most widely used in most installations. Where heavier more demanding loads are required the our 19.7" square foot version kit is available. All kits are supplied with hot dip galvanized angle brackets together with all the necessary hardware to assist the installer in a low cost, versatile and fast assembly solution on site.

Features

- Non-penetrative support
- Flexible design to accommodate late design changes
- Fast and Simple installation
- Hot dip galvanized brackets
- Rubber Mats adhered to feet
- Two foot sizes available.

(Strut not included)
