

995: Flex Inject[®] Sealant Total

Flex Inject Sealant Total has all the great benefits of Flex Inject Sealant Advanced including 3X more sealing power than other tube injection methods, no tools or manifold gauges required, compatible with all oils and refrigerants, polymer free, and now with UV dye included. Available in a six-unit merchandiser.

990: Flash[™] Detect Inject

Flash Detect Inject is an integrated UV dye solution that injects just like Flex inject Sealant Advanced and Total without the use of tools or manifold gauges. As soon as it enters the system, the green dye quickly exposes leaks with the use of a UV leak detection light (the Clight by DiversiTech [89DC](#) is recommended). Available in a six-unit merchandiser.

999KIT: Leak Sealant & Detection Merchandising Kit

This 12-pack merchandising kit is ideal for smaller customers constrained by shelf space. Designed to order as one unit, the kit comes with four units each of the 985, 990, and 995.
