

NEW PRODUCTS OVERVIEW

Now Available: June 2018

623-MIX: Twist-on Wire Connector Kit

Description: The 623-MIX Twist-On Wire Connectors Combo Kit is a very handy and convenient wire connector kit. It contains 600 pieces of color coded, twist-on and winged twist-on wire connectors in 9 commonly use sizes. Its durable and configurable Plano box is a great organizer for wire connector refills and storage. A wiring combinations chart for each connector is also included. It is a great truck stock item for contractors.

6703CM, 6705CM, 6707CM, 6710CM, 6405CM, 6407CM, 6410CM: Evergreen CM Series ECM Motors

Description: Evergreen CM is a drop-in replacement for Constant Torque ECM such as X13 or equivalent competitor models with 24vac speed taps. With no programming requirements it's ready when you need it and has no complex wiring. Evergreen CM motors replace/upgrade PSC motors in applications that DO NOT require on/off delays such as Variable Air Volume (VAV), Fan Filter Units (FFU), A/C or heat pump only air handlers or package units.

6903, 6905, 6907: Evergreen OM Series 460V ECM Motors

Description: Evergreen OM is a versatile high efficiency ECM designed to replace induction motors (shaded pole or PSC) in outdoor fan applications. These applications include motors used with direct-drive fan propellers (axial fan blades) in A/C or Heat Pump systems (including split or package systems).

SpeediChannel® White Fittings and Channel

Description: Now available from DiversiTech is a full line of White color SpeediChannel® fittings and channel. The SpeediChannel line is now available in Natural, White and Brown colors. The SpeediChannel line set protection system remains the product of choice for professional contractors who value high quality installations.

The SpeediChannel system protects and conceals line sets, drain lines and control cables. The system has minimal parts and is fast and easy to install by one person. Made of rigid PVC and UV resistant, it is perfect for indoor and outdoor use. There is a variety of fittings and sizes for multiple indoor or outdoor applications. The new Flex Connector brings a new level of versatility to each installation. Available in natural, brown and now white, the SpeediChannel can also be painted to match any interior or exterior. The new SpeediChannel Brochure and tear-out sheet will help you plan out your next project, saving you even more time.

Make sure to see the new SpeediChannel Brochure with fittings posters and newly updated product bulletin and technical data sheets.

Note: The white installation and fittings kit will be available Q3 2018

991: Super Change Inject

Description: Super Change Inject allows professional HVAC/R contractors a fast and easy way to convert a system from non-POE based oils and refrigerants such as R22 to newer HFC refrigerants including POE-based R407C and R410A without the need to flush the system (excluding compressor burnouts). By adding Super Change with the new refrigerant and oil, a chemical link is created between the old and new oil, thus avoiding a full flush and saving contractors significant time on a system changeout.

Super Change Inject (#991) comes in a four-unit merchandiser with a list price of \$205.08. DiversiTech also continues to offer the #981 Super Change in can with the #20122-reusable hose. Carrying the #981, #991, and #20122 provides your customers with tailored solutions based on the injection method they prefer.

[992 & 993KIT](#): **Boost Juice Inject & Boost Juice in Kit Solutions**

Description: Boost Juice is an HVAC/R system performance improvement additive that lowers energy costs by reducing the amperage draw up to 22% (testing average of 13%) on a system when running. It does this by lubricating the components, removing moisture and oxygen, and dissolving particle debris to a molecular level. This debris is captured in the liquid line drier reducing drag and friction for the refrigerant and oil.

By using Boost Juice, customers can expect to see noticeable improvements in system performance typically within 24 to 72 hours (depending on the state of the system – new versus old) with consistent future performance. Noise levels will also be reduced once Boost Juice is installed providing a long-term benefit to customers. Boost Juice Inject (#992) comes in a four-unit merchandiser with a list price of \$194.76. Boost Juice in a kit (#993KIT) that includes a one-time use hose with solution comes in a six-pack case with a list price of \$147.00. Providing both the #992 and #993KIT provides your customers with tailored solutions based on the injection method they prefer.
